1> Water & Waste water Treatment

(A) Primary Effluent & Sewage Treatment (core infrastructure)

① High-Toxicity Industrial Effluent load: (ETP)
② Municipal Domestic Sewage Drag: (STP)
③ Multi facility Influent volatility: (CETP)

(B) High Recovery Advanced water Engineering

① Stringent Zero-Discharge mandates: (ZLD)
② Concentrated Thermal Brine Accumulation: (crystallizer & Evaporator setups)
③ High Salinity Raw water feed: (RO) (desalination lines),

(C) Biological & Advanced membrane Solutions

① High BOD Suspended organic loading: (MBBR)
② footprint-constrained Biological Deficit: (MBR)
③ Conventional Activated Sludge Drag: (ASP) (Activated sludge process) Structural optimization
④ Batch fed volumetric shock loads: (SBR) cycling

(D) Fine filtration & Pre Treatment Nodes

① Colloidal & macromolecular fouling: UF
② Coarse Suspended particulate Drag: MF
③ High chloride Dissolved mineral Scale: DM / Ion exchange

(E) Specialized Electrochemical & Recovery Systems

① Refractory chemicals COD Shielding: Electrochemical & Electrocoagulation methods.
② Bio-fouling membrance Degradation: membrane care chemical dosing routing

Date / /

⑨ Valuable metal & Nutrient recoghout :->
Resource Recovery & Previous element extraction loops

⑩ High Turbidity Surface water Intake :->
Tube Settler clarifier systems.

(Air pollution)

2) Solid and Hazard waste

(A) Collection & pre-Processing

① material Recovery facility (MRF)
② Shredding & Baling
③ Magnetic & Eddy Current Separation
④ Screening & Air classification
⑤ TSDF Storage & Transfer stations

(B) Thermal & Advanced Recovery (waste to Energy)

① Incineration
② Pyrolysis (Pyrolysis)
③ Gasification
④ Plasma Arc Gasification
⑤ WTE (waste to Energy Plants)
⑥ Co-Processing

(C) Biological Treatment (organic waste)

① Bio methanation
② Composting

(D) Chemical & Stabilization Treatments

① Solidification & Stabilization
② Neutralization & Chemical Treatment

(E) Specialized Recycling & Compliance

① E-waste Recycling
② Biomedical waste Autoclaving
③ Battery & Polymer circularity
④ EPR (Extended Producer Responsibility)

(F) final containment

① Secured Landfill

3) Solar & Renewables

(A) Capital Efficiency & Grid Integration (Financial Efc Nodes)

(1) Capex - constrained Utility Drag
1) ~~Client Diagnostic Problems~~
2) ~~Consultant Tech Solutions~~

(2) Underutilized Capital Tax Leakage
1) ~~Client Diagnostic Problem~~
2) ~~Consultant Tech Solution~~

(3) Spectral Zero - Rooftop Boundary
1) ~~Client Diagnostic Problem~~
2) ~~Consultant Tech Solution~~

(4) Holiday Generation Leakage

(B) Thermal Utility De-fossilization (High emissions factory Boilers)

1. High Cost Low cost Temp Thermal Demand
2. Carbon - heavy Solid fuel penalty penalty
3. High Pressure process steam Deficit
4. High Emission chemical feedstock penalty.

(C) Power Quality & micro Grid Resilience

1. Grid Demand - charge Penalties
2. DG - Solar Synchronization Conflict
3. Isolated Infrastructure Transmission Drag

(D) Agro Industrial Logistics & Supply chains

1. Daylight Irrigation Intermittency
2. Supply - chain Raw material Spoilage
3. Perimeter Security Power Drains

DOMS | Page No.
Date / /

(E) Asset Optimization & Digital Intelligence

1. Soiling Degradation Losses
2. Performance Ratio (PR) Blindspots
3. multi Vendor fragmentation Risk

(F) Alternative fuels & fleet Decarbonization

1. Organic wet waste financial Leakage
2. Logistics fleet Scope-3 Burden

(G) Regulatory Compliance Mechanisms

1. Statutory RPO (RPO) Default Risk)

DOMS | Page No.
Date / /

4> Carbon & ESG (Environment, Safety & Governance)

(A) Scope 1 & Direct Operational carbon footprint
(1) Fossil - fuel Thermal Emission Drag
(2) Industrial Process Carbon Intensity
(3) Internal Carbon Pricing Deficit

(B) Scope 2 & Indirect Energy Tracking
(1) High Emission Grid power Dependency
(2) Thermal Utility Carbon premium

(C) Scope 3 & Supply chain vulnerabilities
(1) Upstream Supplier Carbon Blindspots
(2) Downstream Logistics Footprint Penalties
(3) Employee Commute Emission Drag

(D) Global Trade & Cross Border Compliance
(1) Cross Border Carbon Tax (CBAM) Exposure
(2) Linear Product Lifycycle penalty
(3) Eco - Label marketing vulnerability

(E) ESG Disclosures & Global Framecoorks
(1) Regulatory BRSR Framecoork Default
(2) Global sustainability Disclosure Gaps
(3) Corporate Greencoashing Litigation Risk

(F) Sustainable finance & Banking
(1) Green financing Capital Bottlenecks
(2) climate Scencero physical vulnerability

(G1) Social & Governance (S & G metrics)

1. Supply chain Human Rights Blindspots
2. Occupational Health & Safety Exposure
3. Corporate Anti-corruption compliance Deficit
4. Board Level Diversity & ESG Governance.

Date / /

⑤ Air Pollution & Environmental legal Services

(A) Industrial Air Pollution Engineering (Physical Solutions)
1. Flue gas particulate Emission Drag
2. Acidic & TOXIC Gas venting
3. Fugitive VOC Process Discharges
4. Odour & Hazardous Vapour Infractions
5. OCEMS Hardware Calibration Slip

(B) Statutory SPCB Consents & Approvals (Documentation & Paperwork)
1. CTE/CTO Application Deadlocks
2. Hazardous Waste Authorization Defaults
3. E waste & plastic EPR compliance Gaps
4. CGWA Ground water Extract Deficit
5. Environmental Clearance milestone Delays

(C) SPCB Enforcement & Litigation Defense (Legal Services)
1. SPCB show-Cause & closure Notices
2. forfeiture of compliance Bank Guarantees
3. Environmental Compensation Penalties
4. NGT Tribunal Litigation Drag

(D) Factory Infrastructure & Safety Audits (Site Compliance)
1. Boundary Noise Attenuation Breaches
2. Greenbelt Allocation Structural Deficit
3. Form V Environmental Statement Discrepancies
4. Public Liability Insurance Act (PLIA) Gaps:

(E) Legacy & Supply chain Risk Capping
1. Legacy contamination clean up claims
2. Vendor Environmental compliance Due Diligence
